

## with the Year 3's

Year 3's have been busy for the past 4 weeks into their new unit of inquiry which is Tourism. With the Central Idea "*Communities provide interconnected services designed to meet people's needs*", the students gathered and collated information based on the resort of their choice. Students work in groups to

plan, create and design a resort/hotel of their choice. With the use of MS Publisher, students create a bird's eye view location of their resort. They will also give their opinion and suggestions on the advantages and disadvantages to the local community and to the environment. This will be done by posting a blog. Each student is given the opportunity to post in their answers and at the same time have the chance to view others opinions and ideas. They can also give their support or views on what others think.

This is quite interesting as students are able to share their knowledge and express their views online.
