

# ICT with Reception

This term, Reception students are looking at how people value the natural environment. With the Central Idea ***“People interact with, use and value the natural environment in different ways”*** they have been looking at different artifacts made from natural environment. Through ICT students have been learning about how to use a Microsoft PowerPoint 2010 to create a slideshow. As part of the learning process they will choose artifacts that they have selected and present it using PowerPoint slideshow. Finally the students will print their slides and compile a booklet which will later be shared in the classroom. Students have the opportunity to explore and use Windows 8 to enhance their learning.
